research subject of the doctoral dissertation:

**NANOSI RNP-interactome: structure and dynamics during specification/early stages of human germ cell development – significance for human reproduction.**

The commission board:

prof. dr hab. Ewa Ziętkiewicz – Committee Chairman  
dr hab. Małgorzata Borowiak – Committee Member  
dr hab. Maciej Brązert – External Expert

## positive result

Grounds:

As a result of the mid-term evaluation procedure, pursuant to § 7, point 17, 18, 19 of the Regulations of the Poznań Doctoral School of Institutes of the Polish Academy of Sciences, the committee states that MSc Matisa Alla's project is carried out in accordance with the schedule specified in the Individual Research Plan. The description of the research stages and the obtained results presented by the PhD student shows that the adopted research strategy is appropriate and consistent with the assumptions of the thesis. The Committee evaluates positively progress in the implementation of the project and recommends its continuation.

Poznań, 27<sup>th</sup> September 2022.
